PROFESSIONAL EXPERIENCE

tds.company – 09/2024 to 10/2025

Digital consulting firm, developer of the strategia platform

■ **Front-end Developer**

- Development and maintenance of front-end strategic platform using **React and TypeScript**
- Experience using generative AI and **agentic coding** (e.g., Claude Code) to support development, refactoring, debugging, and delivery acceleration
- Continuous implementation of **new features and bug fixes**
- **Development of interfaces and web applications** with a focus on usability and user experience (UI/UX)
- Collaborative work with backend and design teams for **usability and performance improvements**
- Active participation in **agile ceremonies** (Scrum and Kanban)
- Direct interaction with **Product Owner, Project Manager, QA, and agile coaches**
- **Software testing activities**, ensuring quality and stability of deliveries
- Contribution to the development of sites and digital prototypes using **WordPress, Lovable, V0, and other tools**
- Contribution to the project department, **developing prototypes and digital solutions for clients**
- Development of applications aimed at **optimizing client organizational processes**

KEY ACHIEVEMENTS:

- ✓ Continuous delivery of **features aligned with team planning**
- ✓ Platform maintenance with **bug resolution in user interfaces**
- ✓ Active contribution in the **ideation and planning of new features**
- ✓ Identification of technical improvements and issues during **agile ceremonies**
- ✓ Participation in the development of **application prototypes** for client idea validation
- ✓ Collaboration in building solutions oriented toward **experimentation and innovation**

Setta Energia – 11/2021 to 01/2022

Solar energy supply company

■ **Front-end Developer**

- **Development of CRM platform** for viewing accounts, invoices, and energy consumption
- Construction and evolution of the front-end interface using **React, JavaScript, jQuery, HTML, and CSS**
- **Development of web interfaces** with a focus on user experience
- Work on **web system development and maintenance**
- Support in backend activities, including data manipulation in **AWS and use of DynamoDB**
- Experience with **SQL Server** for data query and manipulation
- Hybrid work with a **fullstack** perspective

KEY ACHIEVEMENTS:

- ✓ Participation in the **initial phase of CRM construction**, from conception
- ✓ Contribution to the **technical and functional planning** of the application
- ✓ Role in the **ideation and definition of features** for the system
- ✓ Support in the **choice of technologies** used in the project
- ✓ Collaboration in **structuring the MVP**, ensuring consistent initial deliveries

love.fútbol – 07/2016 to 05/2020

International NGO building sports courts in communities

■ **Project Assistant**

- **Multifunctional role** in communication, management, and execution of social projects
- **Leadership in the process** of identifying and selecting beneficiary communities
- **Articulation with local and international stakeholders** such as NGOs, construction companies, and municipal governments
- **International experience** with projects in countries such as Argentina, Australia, Brazil, Colombia, United States, India, Mexico, and Nigeria
- **Post-project management**, including monitoring court maintenance and assessing use and social impact
- Relationship with **sponsors and institutional supporters**
- **Management of recurring donor program** (love.fútbol Club)
- **Organization and execution of the charity event** Jogo do Bem, held at Arena Pernambuco
- **Relationship management** with love.fútbol volunteers

KEY ACHIEVEMENTS:

- ✓ Identification and selection of **dozens of communities** for social project implementation across multiple countries
- ✓ Alignment with **local and international stakeholders**: sponsors, public authorities, construction companies, NGOs/partners, and community leaders

- ✓ Establishment of **communication with multinational companies** supporting projects, such as: Disney/ESPN, Unilever, Ambev, Coca-Cola, and others
- ✓ Contribution to the **structuring of the community selection process**, defining criteria and critical factors
- ✓ Development of the **post-project monitoring process**, focusing on: structural maintenance, use, and social impact of the courts
- ✓ Participation in the **organization and execution of the charity event “Jogo do Bem”**, with a large audience and celebrities
- ✓ Support in **structuring the love.futebol Club**: recurring donor program, partnerships with local companies, and definition of communication flows between stakeholders
